

Smiles Craft Mobile — Test Guide

What to check in this build: Cashier & Reports, plus the fixes from the last feedback round.

Build: Milestone 4 preview (Cashier, Reports & Feedback Fixes)

App version: 1.3.0 · **Platform:** Android app file (APK)

Prepared: 3 July 2026

Environment: Connected to the live system — records you create here appear on the web app too.

1. Before you start

- 1. Install the app file (the APK)** from the link shared with you. If Android warns about installing outside the Play Store, allow it for this file.
- 2. Sign in** with your Smiles Craft clinic account — the same email and password you use on the web app.
- 3. Use a real (or clearly-labelled test) patient.** Because the app is connected to the live system, anything you register, book, or charge is saved and will also show on the web app. If you want to experiment freely, create a patient named e.g. *"Test Patient"* so it is easy to spot and remove later.
- 4. Best on a real phone** — your own phone is ideal. Notifications and the calendar gestures behave most realistically there.

How to record your feedback. For anything that looks wrong, please note four things so it can be reproduced quickly: **(1)** the screen, **(2)** the exact steps you took, **(3)** what you expected, **(4)** what actually happened — plus a screenshot if possible. There is a blank feedback table at the end of this guide you can fill in.

2. What's new & fixed in this build

These are the areas that changed since your last review — worth focusing on first. Tags: **NEW** a new feature, **FIX** something corrected, **COMING SOON** full behaviour arrives in an upcoming update.

#	Area	What changed
1	Cashier / Billing NEW	View a patient's bill and their outstanding balance from the phone. (Recording a payment and printing a receipt are COMING SOON — see section 15.)
2	Reports NEW FIX	Income Statement, Revenue by Clinician and Cancellation by Reason. Figures now display correctly as proper amounts, the period buttons are pills (not large circles), and report names read normally.
3	Money totals FIX	All amounts across billing and reports now add up correctly and display as proper currency.
4	Patient Registration FIX	The Clinician field is hidden for single-clinician clinics (the doctor is still filled in automatically behind the scenes).
5	New Appointment & Edit FIX	Date is chosen from a calendar pop-up; the "Send WhatsApp confirmation" toggle now sits inside a bold blue-outlined box.

#	Area	What changed
6	Calendar FIX	Day view follows the clinic's configured slot length (e.g. 30 minutes); overlapping appointments under "All Doctors" show side-by-side; cancelled appointments are locked.
7	Appointment menu NEW	"Book another at this time" now carries over the same clinician, date and time.
8	Home greeting FIX	Now a simple "Hi Dr {Name}" — no repeated title.
9	Notifications FIX	Trimmed to reschedules, cancellations and confirmations only.
10	Future WhatsApp FIX	The message-template list now loads in the scheduler.
11	Switching clinics FIX	Logging out and back in as a different clinic starts from a clean slate.
12	Connection messages FIX	If your phone briefly loses its connection, you now see a clear message instead of a blank screen.

In the checklists below, mark each row **Pass** or **Fail**. Use the feedback table at the end to describe anything that failed.

3. Sign in & account

#	What to test	Steps	Expected result	Result
1	Sign in	Enter your correct email and password → Sign in.	You reach the Home dashboard.	Pass / Fail
2	Wrong password	Enter a wrong password → Sign in.	A clear "wrong credentials" message appears; you stay on the sign-in screen.	Pass / Fail
3	Remember me	Tick "Remember me", sign in, close and reopen the app.	Your email is remembered on the sign-in screen.	Pass / Fail
4	Forgot password	Tap "Forgot password", enter your email, submit.	A confirmation message appears (reset email sent).	Pass / Fail
5	Log out	Open Profile → Log out.	You return to the sign-in screen.	Pass / Fail

4. Home dashboard

#	What to test	Steps	Expected result	Result
1	Greeting	Look at the top of Home.	Reads "Hi Dr {your name}!" — with the title shown once (no "Dr Dr").	Pass / Fail

#	What to test	Steps	Expected result	Result
2	Today's date	Check the date under the greeting.	Shows today's date correctly.	Pass / Fail
3	Today's appointments	Review the list on Home.	Shows today's appointments matching the web app.	Pass / Fail
4	Notifications bell	Have a colleague reschedule, cancel or confirm an appointment; watch the bell.	A red dot appears; tapping the bell shows the notification. (Confirmation notices can also arrive when an appointment is confirmed on the web app.)	Pass / Fail
5	Profile button	Tap your profile icon.	Opens Profile & Settings with your name and role.	Pass / Fail

5. Calendar

#	What to test	Steps	Expected result	Result
1	Slot length	Open Day view.	The time rows match your clinic's slot length (e.g. 30-minute rows), not fixed 1-hour rows.	Pass / Fail
2	Day / Week switch	Switch between Day and Week.	Both render your appointments correctly.	Pass / Fail
3	Navigate days	Swipe left / right; tap "Today".	Moves between days; "Today" jumps back and highlights today.	Pass / Fail
4	Tap an empty slot	Tap an open time slot.	New Appointment opens with that date and time pre-filled.	Pass / Fail
5	Overlapping appointments	With "All Doctors" selected, view a time where two doctors both have an appointment.	Both appointments show side-by-side (not stacked or hidden).	Pass / Fail
6	Unconfirmed colour	Find an unconfirmed appointment.	Unconfirmed appointments all appear in the same yellow colour.	Pass / Fail
7	Drag to reschedule	Press and drag an active appointment to a new time.	It moves and the new time is saved (and shows on the web app).	Pass / Fail

6. Appointment menu (tap an appointment)

#	What to test	Steps	Expected result	Result
1	Details	Tap an appointment.	Patient name, time, procedure and clinician are correct.	Pass / Fail

#	What to test	Steps	Expected result	Result
2	Cancel	Tap Cancel → pick a reason → confirm.	The appointment is cancelled; it updates on the calendar and web app.	Pass / Fail
3	Cancelled is locked	Open the menu on a cancelled appointment.	Only "Change cancel reason" is offered; it cannot be dragged.	Pass / Fail
4	Change cancel reason	On a cancelled appointment, tap "Change cancel reason", pick a new one, tap "Update reason".	The reason updates.	Pass / Fail
5	Book another at this time	On an active appointment, tap "Book another at this time".	New Appointment opens with the same date, time and clinician already filled in.	Pass / Fail
6	Edit / Reschedule	Tap Edit / Reschedule.	Opens the edit screen pre-filled with the appointment's details.	Pass / Fail
7	Confirm 	Look for the Confirm action.	Shown as not-yet-available. (A confirmation can still come through when an appointment is confirmed on the web app — only the manual Confirm button on the phone is coming later.)	Pass / Fail

7. New appointment

#	What to test	Steps	Expected result	Result
1	Clinician field	Open New Appointment in a single-doctor clinic.	The clinician is shown/filled automatically (labelled "Clinician"), with no unnecessary dropdown.	Pass / Fail
2	Date picker	Tap the Date field.	A calendar pop-up opens and you can select the appointment date.	Pass / Fail
3	Start / End time	Set start and end time.	Times accept your input; end must be after start.	Pass / Fail
4	WhatsApp toggle	Find "Send WhatsApp confirmation".	The toggle sits inside a bold blue-outlined box.	Pass / Fail
5	Find patient	Search and select a patient.	Search returns matches; selecting fills the patient in.	Pass / Fail
6	Book & verify	Book the appointment, then filter the calendar by that clinician.	The appointment appears under that clinician (not only under "All Doctors").	Pass / Fail
7	Double booking	Book a second appointment at the same time as an existing one.	Allowed; both appear.	Pass / Fail

8. Edit / reschedule appointment

#	What to test	Steps	Expected result	Result
1	Pre-filled	Open Edit on an appointment.	All fields match the current appointment.	Pass / Fail
2	Change time	Change start/end time → Save.	The calendar shows the new time immediately.	Pass / Fail
3	Date picker & WhatsApp toggle	Check the Date field and WhatsApp toggle.	Same calendar pop-up, and the toggle sits inside a bold blue-outlined box (as in New Appointment).	Pass / Fail
4	Delete	Delete the appointment.	Removed from the calendar and web app.	Pass / Fail

9. Patient registration

#	What to test	Steps	Expected result	Result
1	Required fields	Try to save with Name / Family / Phone empty.	Clear validation messages; cannot save until filled.	Pass / Fail
2	Clinician hidden	Register a patient in a single-doctor clinic.	No clinician dropdown is shown; the patient still saves under the correct doctor.	Pass / Fail
3	Date of birth	Tap the Date of Birth field.	A calendar pop-up opens; picking a date fills in the date of birth.	Pass / Fail
4	Duplicate phone	Register with a phone already in use.	A confirmation dialog asks whether to continue.	Pass / Fail
5	Register & find	Save, then search for the new patient.	The patient appears in search and on the web app.	Pass / Fail
6	Age shows	Open the new patient's card.	Age is calculated and shown from the date of birth.	Pass / Fail

10. Patients list & search

#	What to test	Steps	Expected result	Result
1	Search	Search by name and by phone.	Matching patients are listed.	Pass / Fail
2	Patient card	Open a patient card.	Name, phone, age and allergy show correctly.	Pass / Fail
3	Edit patient COMING SOON	Tap the three-dots (:) menu on a patient card and look at the Edit item.	The Edit item is greyed out with a note that it arrives in an upcoming update — it should not show an error.	Pass / Fail

11. Treatment & Orders

#	What to test	Steps	Expected result	Result
1	Open Orders	From an appointment's menu, tap Orders.	The Treatment & Orders screen opens.	Pass / Fail
2	Procedure & price	Pick a procedure from the dropdown.	Only priced procedures appear; the price fills in automatically.	Pass / Fail
3	Tooth field	Check whether a Tooth field appears.	Shown only for specialties that use tooth numbers.	Pass / Fail
4	Add a row	Set discount / status / notes → Add.	The row moves to the "waiting validation" list; the net amount is correct.	Pass / Fail
5	Update a pending procedure	On an existing pending procedure, change its status.	The status control works and updates the procedure.	Pass / Fail
6	Submit	Tap Submit.	Saved; the patient then appears in the Cashier queue and in Clinical History.	Pass / Fail

12. Plan of Care

#	What to test	Steps	Expected result	Result
1	Add a plan	From an appointment's menu → Plan of Care → type text → Save.	Saved successfully.	Pass / Fail
2	See it in history	Open Clinical History → Plan of Care for that patient.	The plan you entered is listed.	Pass / Fail

13. Schedule future WhatsApp

#	What to test	Steps	Expected result	Result
1	Template list	From an appointment's menu → Future WhatsApp → open the template dropdown.	The list of message templates loads (not empty).	Pass / Fail
2	Pick date	Choose a future date.	Date is accepted.	Pass / Fail
3	Submit	Submit the reminder.	Saved; it appears under the web app's Send WhatsApp section.	Pass / Fail

14. Clinical history

#	What to test	Steps	Expected result	Result
1	Visits	Open Clinical History → Visits for a patient.	Past visits/procedures are listed with correct amounts.	Pass / Fail
2	Plan of Care	Open the Plan of Care tab.	Saved plans are listed.	Pass / Fail

15. Cashier & billing NEW

You can view bills and outstanding balances in this build. **Recording a payment and printing a receipt are being finalised** — the bill screen shows a short note about this, so it's expected for now.

#	What to test	Steps	Expected result	Result
1	Today's cashier queue	Open the Cashier / Billing tab.	Today's patients with charges are listed.	Pass / Fail
2	Bill detail	Open a patient's bill.	Procedures, amounts and totals are shown correctly as proper currency (correct sums). A short note under the button says payment recording is coming in an upcoming update.	Pass / Fail
3	Record payment COMING SOON	Open a bill and tap "Record Payment".	The Record Payment screen opens (choose items to pay, an amount, a method — Cash, Card or Transfer). Full recording is being finalised in an upcoming update, so please don't rely on it yet.	Pass / Fail
4	Receipt COMING SOON	—	Receipts are produced once payment recording is switched on (coming in an upcoming update).	Pass / Fail
5	Outstanding by patient	Open "Outstanding by Patient", search a patient.	Their outstanding items and total are shown and add up correctly.	Pass / Fail
6	All unpaid bills	Open "All Unpaid Bills".	The clinic-wide unpaid list appears. If instead you see a "Couldn't load the unpaid bills" message with a Retry button, that's a known item being finalised — just note it and move on.	Pass / Fail

16. Reports NEW FIX

#	What to test	Steps	Expected result	Result
1	Report names & buttons	Open the Reports tab.	Report names read normally ("Income Statement", "Revenue by Clinician", "Cancellation by Reason"); the period buttons are pill-shaped (not large circles).	Pass / Fail
2	Income Statement	Open Income Statement; try a period.	Revenue, expenses and profit show as proper amounts (no broken or missing figures).	Pass / Fail
3	Revenue by Clinician	Open Revenue by Clinician.	Gross revenue, clinic share and provider share are correct per clinician.	Pass / Fail
4	Cancellation by Reason	Open Cancellation by Reason.	Cancellation counts are grouped by reason and clinician.	Pass / Fail
5	Period filter	Select one or more months.	The figures update for the chosen period(s).	Pass / Fail

17. Notifications, profile & general

#	What to test	Steps	Expected result	Result
1	Notifications list	Open the notifications screen.	Only reschedules, cancellations and confirmations appear (no "new booking added" noise).	Pass / Fail
2	Switch clinics	Log out, log in as a different clinic's user.	No leftover data from the previous account (fresh calendar, patients, filters).	Pass / Fail
3	Keyboard & buttons	On registration, tap the Allergies field; in pop-up boxes, check the bottom buttons.	Fields stay visible above the keyboard; buttons sit above the phone's bottom navigation bar.	Pass / Fail
4	Connection message	If the internet briefly drops during an action.	A clear message appears — not a blank or frozen screen.	Pass / Fail

A few things arrive in an upcoming update (marked COMING SOON above), so please don't treat these as problems in this build: **Edit patient** (greyed in the : menu), the manual **Confirm appointment** action, and **recording payments / receipts** in the cashier. They are already planned and will be switched on in a follow-up.

18. Your feedback

Please note anything that didn't pass, one row per issue.
